Subject: Cavendish Green

Dear Joyce

Swindon Walcot and Parks Community Group have asked me to contact you re: the area of Cavendish Green, Park South. The group were involved in the planning of this area some time after the redevelopment of Cavendish Square. It was left for some time as just an open grassed space but a few years ago was made into a more attractive space for local residents, as was always the intention during the redevelopment.

It is now beginning to look really shabby and although the group have worked with the Nepalese community to replace planting, keep the mini orchard area tidy etc: the planters and non grassed areas in particular are in need of more physical maintenance than we can manage. SWAP have an amount of money left over from a SBC Refresh grant some of which we were intending to use for replacement planting in this surrounds and planters.

We were wondering if the parish would be interested in working with us to refurbish the area with the parish doing the heavier maintenance work and SWAP using the Refresh money to buy any plants/bulbs/shrubs that may be needed?

We look forward to your reply.

Yours sincerely

Carol Brownlee
