Report: New Fence replacement at Town Gardens Park

Explanation

New security fencing was installed at Town Gardens along the western boundary 2 months ago.

1.8m high green palisade fencing was used.

The old gates at the park are currently being restored and it is believed the fencing in the north western entrance is so old and worn that it is no longer secure and will hugely detract the appearance of the newly refurbished gates.

Proposal

Construct 42 m of new palisade fencing in the NW corner of the park (green, 1.8m high) to match the existing new fencing and complement the newly restored gate.
